PROFESSIONAL SUMMARY

Dynamic and proficient Full Stack Web Developer skilled in the MERN stack, Next.js, Docker and CI/CD pipelines. Experienced in building solo and collaborative projects using JavaScript, Node.js, Express.js and MongoDB. Strong problem-solving abilities, a collaborative team player with keen attention to detail, and committed to delivering high-quality, production-ready web solutions.

EDUCATION

Masai

Full Stack Development - Masai

Present

PES University

MCA

Jun 2024

SKILLS

Technical Skills: Docker, RESTful APIs, Redux, CI/CD, Responsive Web Design, MongoDB, Express.js, Node.js, Git, React.js, JavaScript, CSS3, HTML5, Tailwind CSS, NextJS, React Native, cpp
Soft Skills: Adaptability, Time Management, Effective Communication, Problem Solving

EXPERIENCE

Kickbegin | *Associated software developer Intern*

Jan 2025 - Mar 2025

- Developed scalable web applications using Next.js and modern JavaScript frameworks
- Collaborated with cross-functional teams to deliver agile software solutions
- Implemented best practices for code quality and performance optimization
- Integrated APIs and third-party services to enhance application functionality

PROJECTS

Lenskart Clone | *React.js, Node.js, Express.js, Chakra UI, MongoDB, JWT, bcrypt*

- 🔗 Deployed Link : <https://lenskart-clone-two.vercel.app/>
- 📁 Github Repo : https://github.com/MohammedGhouseP/lenskart_clone
- Developed a full-stack e-commerce application using React, Node.js, Express, and MongoDB, replicating key features of Lenskart.com.
- Implemented secure authentication and authorization with JWT sessions, BcryptJS password hashing, and form-level validation.
- Engineered a dynamic product catalog with multiple filters, price sorting, combined filter and sort logic, and paginated display.
- Built interactive shopping cart and wishlist modules supporting add/remove items, quantity updates, and one-click wishlist-to-cart transfers.
- Integrated coupon discount functionality, payment gateway for secure checkout, and a responsive UI optimized for desktop, tablet, and mobile devices.

Voyager Vibes | *React Native, Firebase*

- 📁 Github Repo : <https://github.com/MohammedGhouseP/VoyagerVibes/tree/main/VoyagerVibes>
- Developed a cross-platform mobile app using React Native for discovering and booking travel experiences and local dining.
- Implemented automatic geolocation detection and real-time tracking with Google Maps API to display nearby attractions and restaurants.
- Integrated secure user authentication and profile management features to enhance user privacy and experience.
- Enabled seamless in-app ordering, payment processing with Razorpay, and post-order chat with restaurant owners.
- Utilized Firebase for reliable data storage, real-time updates, and synchronization across devices.

Report | *ReactJS, Chakra UI*

- 🔗 Deployed Link : <https://report-9co9.vercel.app/>
- 📁 Github Repo : <https://github.com/MohammedGhouseP/report>
- Developed an online ticket-raising application for user support with features inspired by Masai.
- Implemented user authentication and CRUD operations using React.js for secure and efficient ticket management.
- Designed and built the front-end interface with Chakra UI, JavaScript, HTML5, and CSS3.

- Enabled ticket categorization and filtering to improve user experience and ticket organization.
- Collaborated effectively to complete the project within 7 days, following agile development practices.
